DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The statement in the declaration that acknowledges the duty to disclose information which is material to the examination is not in compliance.

Claim Rejections - 35 USC § 112

2. Claims 6-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, "a separate paperboard insert is secured to each top end flap" is unclear with respect to how many inserts are being claimed and whether the insert(s) include the previously positively recited insert as set forth in claims 1 and 5. If the insert(s) defined in claim 6 include the one previously set forth in the claims, the phrase is a double inclusion of an element. If the insert(s) defined in claim 6 do(es) not include the one previously defined, it is unclear what insert as previously defined in claims 1 and 5, as disclosed, is being referred to. Claim 6 is further unclear insofar as claims 7-11 and claims 12-20 which all depend from claim 6, respectively are referring to a different number of inserts, i.e. claims 7-11 refer back to a plurality of inserts previously claimed while claims 12-20 refer back to a single insert previously claimed.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 1-3 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-3 of prior U.S. Patent No. 6,968,992. This is a double patenting rejection.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 4 and 5, and claims 6-20, as best understood in view of paragraph 2 above, are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable

over claims 4-20 of U.S. Patent No. 6,968,992 in view of Skolik et al. Claims 4 and 5 of this application differ from claims 4 and 5 of the patent in that the current claims are now limited to a single insert secured to each of the side end flaps whereas the patent claims define a broader scope which encompasses either a single insert or a plurality of inserts. With respect to claim 6, as best understood, the insert is further defined as being a "separate" insert. Skolik et al teaches that it is known to make a handle reinforcing insert from a piece separate from the remaining portions of the container and to make an insert which extends from and secured to the end flaps on the container. It would have been obvious to make the insert as set forth in claims 4-20 of the patent as a separate insert which extends from one end to the other of the container and is secured to the end flaps on the container as taught by Skolik et al to provide reinforcement along the top as well as the ends and as a matter of efficiency in producing and securing a single insert as opposed to a plurality of inserts.
